SUBJECT OF EXAMINATION: There will be a written test which you must pass in order to be considered for appointment. The written test will be designed to test for knowledge, skills, and/or abilities in such areas as:

1. **Preparing written material:** These questions test for the ability to present information clearly and accurately, and to organize paragraphs logically and comprehensibly. For some questions, you will be given information in two or three sentences followed by four restatements of the information. You must then choose the best version. For other questions, you will be given paragraphs with their sentences out of order. You must then choose, from four suggestions, the best order for the sentences.
2. **Inspection and interviewing techniques:** These questions test your ability to select the proper course of action in situations which might occur during routine inspections. Question topics may cover, but will not be limited to, such areas as interviewing, gathering information and evidence, maintaining proper attitude, and handling irregularities and violations with integrity and sound judgment. Some questions may be in a situational format while others may deal with the proper principles and practices of inspection.
3. **Application of scientific principles and knowledge to public and environmental health protection:** These questions test for knowledge of public and environmental health principles, the ability to investigate and identify the causes of various public and environmental health problems, and to recommend the appropriate remedial actions for such problems.
4. **Microbiology as related to disease prevention and control, sanitary chemistry, and toxic substances:** These questions test for knowledge of the principles and practices of microbiology involved in disease prevention and control, including such areas as food, water and environmental sanitation, toxic substances, and communicable diseases.
5. **Supervision:** These questions test for knowledge of the principles and practices employed in planning, organizing, and controlling the activities of a work unit toward predetermined objectives. The concepts covered, usually in a situational question format, include such topics as assigning and reviewing work; evaluating performance; maintaining work standards; motivating and developing subordinates; implementing procedural change; increasing efficiency; and dealing with problems of absenteeism, morale, and discipline.
