SUBJECT OF EXAMINATION: There will be a written test which you must pass in order to be considered for appointment. The written test will be designed to test for knowledge, skills, and/or abilities in such areas as:

1. **Ensuring effective inter/intra agency communications:** These questions test for understanding of techniques for interacting effectively with individuals and agencies, to educate and inform them about topics of concern, to clarify agency programs or policies, to negotiate conflicts or resolve complaints, and to represent one's agency or program in a manner in keeping with good public relations practices. Questions may also cover interacting with the staff of one's own agency and/or that of other agencies in cooperative efforts of public outreach or service.
2. **Preparing written material:** These questions test for the ability to present information clearly and accurately, and to organize paragraphs logically and comprehensibly. For some questions, you will be given information in two or three sentences followed by four restatements of the information. You must then choose the best version. For other questions, you will be given paragraphs with their sentences out of order. You must then choose, from four suggestions, the best order for the sentences.
3. **Application of scientific principles and knowledge to public and environmental health protection:** These questions test for knowledge of public and environmental health principles, the ability to investigate and identify the causes of various public and environmental health problems, and to recommend the appropriate remedial actions for such problems.
4. **Program planning and evaluation:** These questions test for knowledge of the principles and practices involved in effective program planning and management and may include such areas as designing programs to achieve certain goals, staffing program activities, coordinating and guiding the progress of program activities, and evaluating the effectiveness of such programs.
5. **Microbiology as related to disease prevention and control, sanitary chemistry, and toxic substances:** These questions test for knowledge of the principles and practices of microbiology involved in disease prevention and control, including such areas as food, water and environmental sanitation, toxic substances, and communicable diseases.
6. **Administrative supervision:** These questions test for knowledge of the principles and practices involved in directing the activities of a large subordinate staff, including subordinate supervisors. Questions relate to the personal interactions between an upper level supervisor and their subordinate supervisors in the accomplishment of objectives. These questions cover such areas as assigning work to and coordinating the activities of several units, establishing and guiding staff development programs, evaluating the performance of subordinate supervisors, and maintaining relationships with other organizational sections.
