**MICRO COMPUTER LEGAL SYSTEMS SPECIALIST**

**DISTINGUISHING FEATURES OF THE CLASS:** The centralized Niagara County IT position typically is assigned to work in the Niagara County District Attorney's office to support the personnel and information systems used for case management, evidence management, complaints, investigations, and related activities. The incumbent is involved in help-desk support duties, user support, business/systems analysis, troubleshooting wireless and broadband networks, microcomputer repair and operation, working with network administrators in a team environment, and data communications. The work involves the coordination of the installation, maintenance and control of microcomputer site's equipment, personnel training, operation and evaluation of the efficiency of installations. When assigned to the Niagara County District Attorney's Office, the incumbent may be exposed to information of a sensitive and graphic nature related to criminal justice casework while assisting personnel. Work is performed under the supervision of a Computer Programmer and/or assigned superiors. The incumbent must adhere to a strict non-disclosure of information. Does related work as required.

**TYPICAL WORK ACTIVITIES:**

1. Plans and assigns work, organizes work activities, maintains work standards and provides technical assistance to the Micro Computer Coordinators with the completion of IT Helpdesk ticket requests;
2. Responds to and answers IT Help Desk tickets, performs help desk duties including providing first-line diagnostics/trouble-shooting, coordinating solutions, referrals, follow-up and closes completed tickets;
3. Installs, maintains, and recommends software, hardware, and submits purchase requests to IT management for approval;
4. Installs, configures, and supports the PCs, laptops, peripherals, and approved endpoint protection;
5. Diagnoses and repairs computer and peripheral equipment; installs, configures and maintains all computer hardware, associated operating system software and peripherals; trains others to install, configure and maintain equipment and software; and evaluates new equipment, software and peripherals;
6. Assists in the analysis of departmental activities and needs to determine cost-effectiveness of the use of information technology;
7. Troubleshoots wireless and broadband networks and network wiring using tools and testing equipment to validate proper performance;
8. Maintains network diagrams and data on the placement of network devices;
9. Provides training to new and existing staff relating to the use of microcomputers, applications, computing systems and the controlled transmission of information;
10. Provides support to personnel using information applications and systems on premise and off-site;
11. Runs diagnostic software programs to ensure operational integrity and coordination of microcomputer activities, services, and functions;
12. Utilizes word processing, database management, spreadsheet, data communications, and criminal justice system software;
13. Provides assistance, support, and instruction for attorneys in the timely use of technology, software, and information systems to satisfy legal case-specific needs;
14. Assists users with the retrieval of documents and testimony in preparation for document productions, depositions, and trials;
15. Collaborates with IT personnel, software programmers, and vendors to ensure information systems are updated or modified as necessary to meet cybersecurity and functional requirements;
16. Supports staff in the transfer and review of object character recognition information within software programs and systems; and
17. Assists with the development of computer-generated graphics, demonstrative evidence and presentations.
